EDUCATION

VELLORE INSTITUTE OF TECHNOLOGY, BHOPAL, MP, INDIA

Oct 2022 - 2027

Integrated MTech in Artificial Intelligence

- Academic Performance: Secured 8.0 CGPA.

TECHNICAL SKILLS

Product & Research: Product Research, Market Research, Competitor Analysis, Trend Research, User Research, Problem Identification, Requirement Analysis

UX/UI: User-Centered Design, Personas, User Journeys, Wireframing, Prototyping, Design Thinking, UI Design

Business & Analytics: Power BI, Excel, SQL, Data Analysis, Data Visualization, Demand Forecasting, Inventory Planning

AI & Automation: AI Automation, Workflow Automation, No-Code/Low-Code Automation, LLMs, LangChain, RAG, Prompt Engineering

Technical: Python, Java, FastAPI, REST APIs, Git, Docker, MySQL, MongoDB

WORK EXPERIENCE

BHARAT ELECTRONICS LIMITED (BEL)

Bangalore, India

AI Intern

Nov'2025 – Dec'2025

- Worked as part of a cross-functional development team to build an intelligent document-processing solution, translating project requirements into structured data and automation workflows.
- Built data ingestion and preprocessing pipelines using Python, FastAPI and Docker to organize unstructured information for downstream analysis and reporting.
- Developed semantic retrieval and automated summarization workflows to improve the accessibility and consistency of information.
- Collaborated with team members through iterative development, requirement discussions, testing and feedback, contributing to timely delivery of project modules.

SHIVRAI TECHNOLOGIES PVT. LTD.

Remote

Full Stack Developer Intern

Oct'2024 – Dec'2024

- Developed and iterated on web-based solutions using Python, FastAPI, JavaScript and SQL based on project requirements and user needs.
- Collaborated with team members to integrate APIs, databases and application workflows within defined delivery timelines.
- Participated in requirement discussions, testing and iterative improvements using Git and Agile practices to support team delivery.

PROJECTS

AI-Powered Company Research Assistant — Hackathon Project [\[GitHub\]](#)

Python | Web Research | Web Crawling | OpenRouter | AI Automation | PDF | Discord

2026

- Developed an AI-powered research automation tool to **streamline company, market, and competitor research** using web search and website crawling.
- Integrated OpenRouter AI to analyze collected information, identify business pain points, suggest competitors, and generate structured PDF reports.
- Automated the end-to-end workflow from **research** → **analysis** → **reporting** → **sharing** with Discord integration, reducing manual research effort.

Inventory Demand Forecasting & Analytics — [\[GitHub\]](#)

Python | Pandas | NumPy | Scikit-learn | XGBoost | Power BI |

2025

- Developed a demand forecasting solution using retail inventory data to analyze historical demand patterns and support inventory planning and business decisions.
- Performed data cleansing, exploratory analysis and feature engineering, comparing multiple machine-learning models for demand prediction.
- Analyzed demand trends and forecast results to support decisions related to inventory requirements, stock availability and supply-chain planning.

ACHIEVEMENTS & CERTIFICATIONS

- Hackathon: AI-powered company research project shortlisted for the interview stage.
- Google UX Design Professional Certificate — Google / Coursera
- Google Cloud Generative AI: Vertex AI, Gemini, Prompt Design
