

VIDHIKA JAIN

Software Engineer | AI/ML Enthusiast

Bhopal, India ✉ jainvidhika410@gmail.com | ☎ 6261598340 🔗 [Linkdln](#) | [GitHub](#)

EDUCATION

Integrated M.Tech in Artificial Intelligence	2022-Present
Vellore Institute of Technology (VIT), Bhopal CGPA: 8.0 / 10	
Holy Angels Hr. Sec. School, Ashta Class XII: 87%	2022
Holy Angels Hr. Sec. School, Ashta Class X: 86%	2020

TECHNICAL SKILLS

Programming & Backend: Python, Java, SQL, FastAPI, REST API Development
Generative AI & LLMs: LLM Fundamentals, Prompt Engineering, Retrieval-Augmented Generation (RAG - basic), NLP
Machine Learning & Deep Learning: Supervised Learning, CNNs, Model Evaluation
Data Engineering: ETL Pipelines, Data Validation, Apache Airflow, PySpark
Data Structures & Algorithms: Arrays, Hashing, Basic Graph Algorithms
Databases: Relational Databases (SQL)
Tools & Systems: Git, Docker, Linux/UNIX

PROFESSIONAL SUMMARY

Pre-final year Integrated M.Tech student in Artificial Intelligence with strong skills in Data Structures, Algorithms, OOP, Python, Java, and SQL. Experienced in building AI-driven applications, backend systems, and scalable APIs using Python, FastAPI, Machine Learning, CNNs, and NLP. Familiar with Generative AI, LLMs, Prompt Engineering, RAG, data pipelines, and system design, with a focus on efficient real-world solutions.

INTERNSHIP EXPERIENCE

AI Intern	Bharat Electronics Limited (BEL), Bangalore	Nov 2025 – Dec 2025
- Built a scalable document processing system using Python, FastAPI, Docker, handling 10K+ documents/day. - Developed automated PDF/Word data pipelines, improving processing efficiency by ~25%. - Implemented NLP-based summarization (HuggingFace), reducing latency by ~30%. - Designed a hybrid (offline + API) inference system, ensuring ~95% uptime in low connectivity. - Created validation & monitoring pipelines, improving accuracy by ~15%. - Optimized end-to-end workflows, achieving ~20–30% faster execution. - Containerized services using Docker + Git, enabling reproducible deployments.		

TECHNICAL PROJECT EXPERIENCE

AI Agent for End-to-End App Development	2026
- Developed a multi-agent AI system for automated app planning, code generation, testing, and deployment (<i>CrewAI, Ollama, Python</i>). - Built full-stack project generation workflows with automated execution and debugging (<i>FastAPI, React</i>). - Implemented agent orchestration, memory sharing, and task automation for end-to-end software development (<i>LangGraph, ChromaDB</i>). - Designed a dashboard for project management, monitoring, and downloadable project exports (<i>React, Tailwind CSS, Docker</i>).	
Plant Disease Detection Using Deep Learning	2025
- Developed a CNN-based plant disease detection system (<i>TensorFlow, Keras</i>). - Implemented image preprocessing and classification pipelines (<i>OpenCV, NumPy</i>). - Built a real-time prediction web app (<i>Streamlit, Python</i>). - Collaborated on development and version control (<i>Git, GitHub</i>).	

ACHIEVEMENTS & CERTIFICATES

- 5★ in Problem Solving, Java, and Python on [HackerRank](#)
- [Completed multiple Google Cloud certifications on Google Cloud Skills Boost \(Gen AI, Vertex AI, Gemini\)](#)
- Achieved Diamond League (10,000+ points) on Google Cloud Skills Boost
- Certified in SQL (Basic) and Python (Basic) on HackerRank
- [Getting Started with AI and Machine Learning](#)
- [Applied Machine Learning in Python](#)
